MCFlow

Release v1.1.0

Robert F. De Jaco

Jul 27, 2020

CONTENTS:

CHANGE MC PROBABILITIES

The probabilities of a batch of input files can be changed via

```
python3 /path/to/changeProbs.py -f /paths/to/file/dirs -i names
```

where `/paths/to/file/dirs` are the paths to the parent directories of the independent simulations, and `names` are the names of the independent simulations.

Note: it is recommended to add the `-vv` argument to get extra verbosity to see what happens

---

For example, the invocation might be

```
python3 ~/MCFlow/mcflow/changeProbs.py -f *-0/*K/0.001MPa -i 1 2 3 4
```

To find out more options, ask for help

```
python3 /path/to/changeProbs.py --help
```
